## RELATED EXPERIENCE

### FREELANCE DEVELOPER

- Communicated with clients to layout their desired ideas into **Figma wireframes** and utilize feedback to best push projects forward
- Developed websites according to client direction and **professional standards**
- Created custom **graphic designs** for site logos, headers, and favicons to match client brands
- Managed projects from the concept & design stage to delivering a quality product

### CMMT REPRESENTATIVE

#### Shift4 Payments

- Assisted **industry-leading business owners** with account conversions and related issues via phone and email
- Delegated and scheduled tasks** to internal technical installers
- Demonstrated time management skills by taking on **multiple projects**, performing with the team's highest completion and accuracy rating
- Provided **advisement to team members** regarding new processes per supervisor recommendation
- Completed company **Salesforce training** and assisted in training new users

### SOFTWARE DEVELOPMENT STUDENT

#### Boise CodeWorks

- Developed and implemented software applications, accumulating over **500 hours** of hands-on experience in front-end, back-end, and **full-stack development**
- Served as **Scrum Master** within multiple development teams, successfully delivering ambitious full-stack projects through well-planned and executed development cycles
- Utilized **JavaScript**, SCSS, **Vue 3**, **Node.js**, MongoDB, MySQL, Bootstrap 5, and **C#** to build over 40 projects

## PROJECTS

### Troop

Full-Stack application all about events! Create & host them, reserve tickets to them, and discuss them in the comments!

Built using React & C# (.NET)  
([ry-troop.onrender.com](https://ry-troop.onrender.com))

### Keeper

Boise CodeWorks Final project, a Pinterest-like application for posting and viewing public Keeps (pictures) and being able to save them into viewable collections known as Vaults.

Built using Vue & C# (.NET)  
([ry-keeper.onrender.com](https://ry-keeper.onrender.com))

### Gratuities

Full-Stack capstone project to make a high-quality mobile & desktop application geared towards giving workers their due, allowing them to be tipped directly for their services.

Built using Vue & Node.js  
([gratuities.onrender.com](https://gratuities.onrender.com))

### Who Do You VooDoo?

Front-End expansive clicker game for desktop and mobile. Features earnable currency, purchasable upgrades, RNG loot systems, custom sound effects, music, achievements, and completely custom art & design.

Built using Vue, HTML, SCSS, & Bootstrap  
([theonetruey.github.io/vooDoo/](https://theonetruey.github.io/vooDoo/))

### Alice Duff Portfolio

Front-End site made for a client to show off their Special Effects Makeup and Assistant Director Film work on a quality site to potential employers.

Built using Vue, HTML, SCSS, & Bootstrap  
([zjduff.vercel.app/](https://zjduff.vercel.app/))
