Certified as of 2023

INTERNET ACADEMY

Highschool Diploma | 3.85 GPA

SUMMARY

Web & App Developer and Designer with a passion for clean code and applications. I am seeking a long-term career at a company where I can continue to grow, face new challenges, and hone my existing skill set.

INDUSTRY EXPERIENCE

APP DEVELOPER

Pennant Services

- **Managed** a multitude of projects from initial design through production, go live, and maintenance.
- Utilized **Retool** for front-end development (**JavaScript**, **HTML**, and **CSS**).
- Worked with **Snowflake** and **SQL** for back-end data development & usage.
- Frequently **collaborated** with designers and data developers on major projects as Lead Front-End Dev.
- Designed **UI** and **UX** for smaller projects where a designer was not needed.
- Efficiently **assisted** team members when pushing out important updates in a timely manner.
- Adhered to **Scrum/Agile** methodology throughout the development process on all projects.
- Served as the lead developer for the team's only **mobile** application.

FREELANCE DEVELOPER

- Communicated with clients to layout their ideas as **Figma** wireframes and utilized feedback to best push projects into live sites.
- Developed websites according to client direction and professional standards.
- Managed projects from the concept & design stage to delivering a finalized, quality product.

CMMT (TEAM LEAD)

Shift4 Payments

- Assisted business owners by scheduling and providing **technical support** during the onboarding process with proprietary payment processing software and equipment.
- Demonstrated time management and leadership skills by taking on **multiple roles and projects**, performing with CMMT's highest completion and accuracy rating.
- Completed **Salesforce training** and assisted in training new salesforce users within the company.

EDUCATION OVERVIEW

BOISE CODEWORKS

- Developed and implemented software applications, accumulating over 500 hours of hands-on experience in front-end, back-end, and full-stack development.
- Created 40 coding projects both in solo and team settings
- Utilized JavaScript, SCSS, Vue 3, Node.js, MongoDB, mySQL, Bootstrap 5, and C# to build over 40 projects.
- Completed certification with a 100% grading on every assignment.

FEATURED PROJECTS

EasilySWADE

Full-Stack application companion to the TTRPG "Savage Worlds," also known as SWADE. Actively used for my own campaign, with more updates on the way to host an expanded userbase!

Built using Vue 3, Node.js, and MongoDB
([EasilySWADE.com](https://easilyswade.com))

PawketPetsVT

Full-Stack extensive multiplayer web-game collecting, customizing, playing with, and battling a user's favorite V-Tuber streamers à la NeoPets. Features Twitch integration, overlays for streamers, and Discord integration.

Built using Vue, Node.js, Supabase/SQL, and Claude Code.
([PawketPets.net](https://pawketpets.net))

Auto Upgrade Leveled Items

Mod developed for TES IV: Oblivion Remastered. Hundreds of thousands of downloads & the highest number of User Endorsements of any Gameplay category mod for the game.

Built using ES Creation Kit & Papyrus
(nexusmods.com/oblivionremastered/mods/567)

Who Do You VooDoo?

Front-End expansive clicker game for desktop and mobile. Features earnable currency, purchasable upgrades, RNG loot systems, custom sound effects, music, achievements, and completely custom art & design.

Built using Vue, SCSS, & Bootstrap
(theonetruey.github.io/vooDoo/)

Alice Duff Portfolio

Front-End site commissioned by a client to show off her Special Effects Makeup and Assistant Director Film work on a quality site to potential employers.

Built using Vue, SCSS, & Bootstrap
(zjduff.vercel.app/)

Gratuities

Full-Stack concept application to make a high-quality mobile & desktop concept application geared towards giving business employees their due, allowing them to be tipped directly for their services.

Built using Vue, Node.js, and MongoDB
(gratuities.onrender.com)
